

A chairde,

I would like you to consider the **PFG reflected priority to promote Health and well being similarly Budget and investment to deliver fair outcomes and social improvements through the implementation of policies and programmes to develop new and innovative measures which will address patterns of inequality and social disadvantage.** With this considered I would ask that you consider the fact that Dungiven needs a By-pass this has been promised this for many years. Now in 2008 with the increase in cars on our roads pollution gets steadily worse in Dungiven main street so in the interests of health and well being a By-pass should be a priority.

Historically West of the Ban has suffered from the lack of investment resulting in inequality and lack of social disadvantage.

If the programme for government is about addressing all forms of inequality then the above should be considered

Is mise
